claim
Governments and technology companies must do more to protect online privacy and security.
Governments and technology companies must do more to protect online privacy and security.
Cultured/lab-grown meats should be allowed to be sold
Social media companies should be required to label AI-generated content
Employers should be allowed to monitor employees through tracking mechanisms.
Requiring all police officers to wear body cameras should not be mandated
Self-driving cars will increase safety and should replace human drivers.
Drug importation jeopardizes safety controls and the domestic pharma industry.
College athletes should not be paid salaries
The US should ban all cultured or lab-grown meat products
Genetic engineering of unborn babies should be allowed to eliminate disease.
The minimum wage should be raised to $15 per hour nationwide.
Social media platforms should not censor any legal speech.
Internet access should not be considered a basic human right
Recreational drone pilots should not require registration and testing
Self-driving cars will increase safety and should replace human drivers.
Emotional companion AI poses risks of attachment and should be limited
Self-driving cars will not be safe enough to fully replace human drivers.
Space tourism should be limited until safety regulations are further developed
Tenure for university professors should be reformed or eliminated
Employee tracking infringes on privacy rights and should face restrictions.
Lifespan extension would exacerbate inequities and should not be pursued
Cultured/lab-grown meats should be allowed to be sold
Internet access should be considered a basic human right
Recreational drone pilots should be registered and tested
Internet access should not be considered a basic human right
Employers should be allowed to monitor employees through tracking mechanisms.
No limits should be placed on acceptable human risk for initial Mars colonization missions
Emotional companion AI poses risks of attachment and should be limited
Recreational drone pilots should be registered and tested
Self-driving cars will not be safe enough to fully replace human drivers.
Space tourism should be allowed without initial limits on safety regulations
Employee tracking infringes on privacy rights and should face restrictions.
Prescription drug ads should be allowed on television
All police officers should be required to wear body cameras
Space tourism should be allowed without initial limits on safety regulations
Social media platforms should not be liable for harmful content posted by users
The US should ban all cultured or lab-grown meat products
Smartphones/social media should not be banned for kids under 16
Employers should be allowed to monitor employees through tracking mechanisms.
Limits should be placed on acceptable human risk levels for initial Mars colonization missions
Self-driving cars will not be safe enough to fully replace human drivers.
Limits should be placed on acceptable human risk levels for initial Mars colonization missions

Governments and technology companies must do more to protect online privacy and security.
Banning gas car sales too soon is unrealistic
Space tourism should be limited until safety regulations are further developed
Space tourism should be allowed without initial limits on safety regulations
College athletes should be paid salaries
It is fair for insurers and lenders to use credit scores and risk models.
Social media companies should be required to label AI-generated content
Social media companies should not be required to label AI-generated content
Cultured/lab-grown meats should be allowed to be sold
Charter schools increase options and drive education innovation.
Charter schools divert public funds away from traditional public schools.
Genetic engineering of unborn babies should be allowed to eliminate disease.
Governments and technology companies must do more to protect online privacy and security.
Emotional companion AI poses risks of attachment and should be limited
Self-driving cars will not be safe enough to fully replace human drivers.
Recreational drone pilots should not require registration and testing
Geoengineering poses too many risks and should not be considered.
Recreational drone pilots should not require registration and testing
Social media platforms should be liable for harmful content posted by users
Lifespan extension would exacerbate inequities and should not be pursued
University professor tenure should remain as is
Social media companies should not be required to label AI-generated content
Social media companies should not be required to label AI-generated content
College athletes should not be paid salaries
Governments and technology companies must do more to protect online privacy and security.
People receiving welfare benefits should be tracked to prevent fraud/abuse.
Geoengineering poses too many risks and should not be considered.
Internet access should be considered a basic human right
Social media should verify user identities
No limits should be placed on acceptable human risk for initial Mars colonization missions
People receiving welfare benefits should be tracked to prevent fraud/abuse.
The minimum wage should be raised to $15 per hour nationwide.
Virtual emotional companion AI should be allowed and unrestricted
It is fair for insurers and lenders to use credit scores and risk models.
Space tourism should be allowed without initial limits on safety regulations
Banning gas car sales too soon is unrealistic
Climate geoengineering research should be pursued as a potential solution.
Social media platforms have a duty to moderate harmful content.
Tracking welfare recipients violates privacy and harms vulnerable populations.
Gas car sales should be banned after a set phase-out date
College athletes should not be paid salaries
Social media should not be required to verify user identities
Social media companies should be required to label AI-generated content
Corporations should be required to disclose their climate impacts

The minimum wage should be raised to $15 per hour nationwide.
Drug importation jeopardizes safety controls and the domestic pharma industry.
Internet access should be considered a basic human right
Raising the minimum wage to $15 would hurt small businesses and jobs.
Climate geoengineering research should be pursued as a potential solution.
Social media platforms should not be liable for harmful content posted by users
Self-driving cars will not be safe enough to fully replace human drivers.
Employers should be allowed to monitor employees through tracking mechanisms.
Social media should not be required to verify user identities
University professor tenure should remain as is
Lifespan extension would exacerbate inequities and should not be pursued
University professor tenure should remain as is
Social media companies should not be required to label AI-generated content
Individuals must take responsibility for online privacy without excessive government mandates.
All police officers should be required to wear body cameras
Cultured/lab-grown meats should be allowed to be sold
Prescription drug ads should be allowed on television
Smartphones/social media should be banned for kids under 16

Raising the minimum wage to $15 would hurt small businesses and jobs.
Genetic engineering of unborn babies should be allowed to eliminate disease.
Genetic engineering of unborn babies should be allowed to eliminate disease.
Individuals must take responsibility for online privacy without excessive government mandates.
Cultured/lab-grown meats should be allowed to be sold
Smartphones/social media should be banned for kids under 16
Self-driving cars will increase safety and should replace human drivers.
Recreational drone pilots should be registered and tested
It is fair for insurers and lenders to use credit scores and risk models.
College athletes should be paid salaries
Recreational drone pilots should be registered and tested
Requiring all police officers to wear body cameras should not be mandated
The US should ban all cultured or lab-grown meat products
Corporations should not be required to disclose their climate impacts
University professor tenure should remain as is
Virtual emotional companion AI should be allowed and unrestricted
Anti-aging therapies should be made available even if expensive
The minimum wage should be raised to $15 per hour nationwide.
Space tourism should be limited until safety regulations are further developed
Emotional companion AI poses risks of attachment and should be limited
Virtual emotional companion AI should be allowed and unrestricted
Social media should not be required to verify user identities
All police officers should be required to wear body cameras
Social media companies should not be required to label AI-generated content
Climate geoengineering research should be pursued as a potential solution.
University professor tenure should remain as is
People receiving welfare benefits should be tracked to prevent fraud/abuse.
Smartphones/social media should be banned for kids under 16
Social media should verify user identities
Banning gas car sales too soon is unrealistic
Social media platforms should not be liable for harmful content posted by users
Basing decisions on credit scores and models is discriminatory.
Internet access should not be considered a basic human right
Basing decisions on credit scores and models is discriminatory.
Tracking welfare recipients violates privacy and harms vulnerable populations.
Gas car sales should be banned after a set phase-out date
Internet access should be considered a basic human right
Prescription drug ads should be allowed on television
All police officers should be required to wear body cameras
Employers should be allowed to monitor employees through tracking mechanisms.
Charter schools increase options and drive education innovation.
Virtual emotional companion AI should be allowed and unrestricted
Employee tracking infringes on privacy rights and should face restrictions.

Emotional companion AI poses risks of attachment and should be limited
Limits should be placed on acceptable human risk levels for initial Mars colonization missions
The US should ban all cultured or lab-grown meat products
Internet access should be considered a basic human right
Drug importation jeopardizes safety controls and the domestic pharma industry.
Genetic modification of unborn babies is unethical and dangerous.
Banning gas car sales too soon is unrealistic

University professor tenure should remain as is
Social media platforms have a duty to moderate harmful content.
All police officers should be required to wear body cameras
Social media should verify user identities
Genetic modification of unborn babies is unethical and dangerous.
Climate geoengineering research should be pursued as a potential solution.
The minimum wage should be raised to $15 per hour nationwide.
Geoengineering poses too many risks and should not be considered.
Social media platforms should be liable for harmful content posted by users
Governments and technology companies must do more to protect online privacy and security.
Smartphones/social media should not be banned for kids under 16
Charter schools divert public funds away from traditional public schools.
Social media should not be required to verify user identities
Internet access should be considered a basic human right
Space tourism should be limited until safety regulations are further developed
Employers should be allowed to monitor employees through tracking mechanisms.
Genetic modification of unborn babies is unethical and dangerous.
Genetic modification of unborn babies is unethical and dangerous.
Genetic modification of unborn babies is unethical and dangerous.
Anti-aging therapies should be made available even if expensive
Drug importation jeopardizes safety controls and the domestic pharma industry.
Corporations should be required to disclose their climate impacts
Internet access should not be considered a basic human right
Tenure for university professors should be reformed or eliminated
Geoengineering poses too many risks and should not be considered.
Raising the minimum wage to $15 would hurt small businesses and jobs.
The minimum wage should be raised to $15 per hour nationwide.
Internet access should not be considered a basic human right
Smartphones/social media should be banned for kids under 16
No limits should be placed on acceptable human risk for initial Mars colonization missions
Social media should not be required to verify user identities
Virtual emotional companion AI should be allowed and unrestricted
Self-driving cars will not be safe enough to fully replace human drivers.
Social media platforms have a duty to moderate harmful content.

People receiving welfare benefits should be tracked to prevent fraud/abuse.
Geoengineering poses too many risks and should not be considered.
Virtual emotional companion AI should be allowed and unrestricted
Social media platforms should not censor any legal speech.
Social media companies should be required to label AI-generated content
University professor tenure should remain as is
Limits should be placed on acceptable human risk levels for initial Mars colonization missions
The US should ban all cultured or lab-grown meat products
Prescription drug ads should not be allowed on television
Social media companies should be required to label AI-generated content
Virtual emotional companion AI should be allowed and unrestricted
Governments and technology companies must do more to protect online privacy and security.
Social media platforms should not be liable for harmful content posted by users
